

September 19, 2017

Dear Customer,

Thank you for your interest in sampling the Nestlé Health Science OPTISOURCE® Products, specially formulated for use after bariatric surgery.

You can initiate a request for samples once per month by emailing [OPTISOURCE.Samples@us.nestle.com](mailto:OPTISOURCE.Samples@us.nestle.com). Please include your name, complete mailing address, phone number, and the number of surgeries per month at your facility with your request.

We will provide you with 8 count sample bottles of OPTISOURCE® Chewable Vitamin & Mineral Supplement, as well as OPTISOURCE® Patient Brochures. The amount of samples you will receive will be based on how many patients you see per month, up to 75 sample bottles. Please offer each of your Bariatric surgery patients a sample to try the product before purchase. The vitamins are available to purchase at Walgreens or online through the Nestlé Nutrition Store at [www.nestlenutritionstore.com](http://www.nestlenutritionstore.com) or by calling 1-888-240-2713.

If your patients are interested in the OPTISOURCE® Very High Protein Drinks and Beneprotein® for post-surgical use, please encourage them to order these products from the Nestlé Nutrition Store. These products can be purchased in small quantities for trial. These products are not a part of the sample program.

Fulfilment of your sample request may take 14-21 days for arrival. Once again, thank you for your interest and OPTISOURCE® recommendations to post bariatric surgery patients.

OPTISOURCE® Sampling Program
